🔗 VirajJayasiri

📍 Colombo, Sri Lanka

Profile Summary

Computer Science undergraduate at the University of Westminster, delivered by IIT Sri Lanka, graduating in 2028. Hands-on project experience building backend, full-stack, real-time, and AI-powered applications using Java, Python, Spring Boot, FastAPI, React, MongoDB, PostgreSQL, Docker, and AWS. Skilled in REST API development, JWT authentication, testing, debugging, and cloud deployment. Seeking a Software Engineering Internship to contribute to reliable and well-structured software solutions.

Education

BSc (Hons) Computer Science

2025–2028

University of Westminster, United Kingdom

Delivered by Informatics Institute of Technology, Sri Lanka

Relevant Coursework : Object-Oriented Programming, Data Structures and Algorithms, Software Engineering Principles and Practice, Database Systems, Client-Server Architectures, Web Design and Development, and Machine Learning and Data Mining

Selected Academic Results : Machine Learning and Data Mining Coursework - 91% ; Client-Server Architectures Coursework - 81%

Foundation Certificate in Computing

2025

Informatics Institute of Technology, Sri Lanka

G.C.E. Advanced Level Examination - Physical Science Stream

2022

Maliyadeva College, Kurunegala

Subjects : Combined Mathematics, Physics, and Chemistry

Technical Skills

Programming Languages – Java, Python, JavaScript, TypeScript, Go, SQL

Backend Development – Spring Boot, FastAPI, Node.js, Express.js, Firebase Authentication, AngularFire, REST APIs

Frontend Development – Angular, React.js, Next.js, HTML5, CSS3, Tailwind CSS, Chart.js

Databases – PostgreSQL, MongoDB, Cloud Firestore, Relational Database Design

Cloud and DevOps – Docker, AWS EC2, Firebase Hosting, Git, GitHub, GitHub Actions, Maven

Testing and Development Tools – JUnit, Jasmine, Karma, Postman, Streamlit, Figma

AI and Machine Learning – OpenCV, MTCNN, DeepFace, scikit-learn, NumPy, Pandas

Software Engineering Concepts – Object-Oriented Programming, Data Structures and Algorithms, CRUD, JWT Authentication, WebSockets, SDLC, Testing, Debugging, and Troubleshooting

Projects

1. ConnectHub - Real-Time Communication Platform | 2026

Role: Full-Stack Developer

🔗 github.com/VirajJayasiri/connecthub-springboot-react

Technologies: Java, Spring Boot, Spring Security, React, MongoDB, JWT, WebSocket, STOMP, LiveKit, Docker, AWS EC2

- Developed a full-stack communication platform featuring secure user authentication, profiles, friend management, posts, topic-based chat rooms, and real-time messaging.
- Designed RESTful APIs using Spring Boot and implemented authentication and authorization using Spring Security and JSON Web Tokens.
- Implemented real-time messaging using WebSocket and STOMP, integrated LiveKit for voice and video rooms, and containerized and deployed the backend services using Docker and AWS EC2.

2. DevBuddy - Java CLI DevOps Automation Tool | 2026

Role: Java Developer

🔗 github.com/VirajJayasiri/devbuddy-java-cli-devops-automation-tool

Technologies: Java 21, Picocli, Maven, JUnit, Git, GitHub Actions

- Developed a Java command-line tool that automates Maven project initialization, development-environment checks, README generation, changelog management, versioning, and CI workflow setup.
- Applied object-oriented programming through reusable command, service, validation, configuration, and file-handling components.
- Implemented dry-run and force options, created automated tests using JUnit, and configured build and testing workflows using Maven and GitHub Actions.

Projects

3. ExpenseWise - Smart Expense Tracker | 2026

Role: Full-Stack Developer

 github.com/VirajJayasiri/expensewise-angular-firebase

Technologies: Angular, TypeScript, Angular Material, Firebase Authentication, Cloud Firestore, AngularFire, Chart.js, Firebase Hosting

- Developed a responsive personal finance web application with secure registration, login, protected routes, and complete CRUD workflows for income and expense transactions.
- Implemented monthly income, expense, and balance calculations, category-based Chart.js visualizations, transaction search, filtering, sorting, and CSV export.
- Integrated Firebase Authentication and Cloud Firestore with user-scoped data access, validation, and security rules, and deployed the application using Firebase Hosting.

4. NexAttend - AI-Powered Smart Attendance System | 2025-2026

Role: AI and Backend Developer

 nexattend.com

Technologies: Python, FastAPI, React, OpenCV, MTCNN, DeepFace, MongoDB

- Developed an AI-powered attendance system that identifies students from webcam input and automatically records their attendance.
- Implemented a face-recognition pipeline covering face detection, facial embedding generation, similarity matching, and attendance processing.
- Developed FastAPI endpoints and integrated them with the React frontend and MongoDB for student management, recognition processing, and attendance-data retrieval.

5. FastAPI JWT Authentication API - Secure REST Backend | 2026

Role: Backend Developer

 github.com/VirajJayasiri/fastapi-jwt-authentication-with-media-upload-app

Technologies: Python, FastAPI, JWT, SQL, ImageKit, Streamlit, REST APIs

- Built a secure RESTful backend supporting user registration, login, JWT-based authentication, protected endpoints, input validation, and CRUD operations for post management.
- Integrated SQL database persistence and ImageKit media uploads to support structured application data and image storage.
- Developed a Streamlit interface to test authentication, media-upload, and CRUD workflows through the API.

Leadership, Achievements & Activities

Team Lead - Problem-Solving International Hackathon

2026

1st Place at IIT | 4th Place at the University of Westminster

- Led problem analysis, task coordination, solution development, and the final presentation within the competition deadline.

Cutting Edge'25 - Volunteer

2025

- Supported event coordination, participant assistance, and on-site activities to help ensure the successful delivery of the event.

Algorand Foundation Blockchain Workshop - Participant, IIT

2025

- Gained practical exposure to blockchain concepts and decentralized application development.

Certifications & Credentials

Cambridge Linguaskill English Proficiency Certificate

2025

University of Cambridge, UK Delivered by IIT Professional Development Unit

Microsoft Certified: Azure AI Fundamentals (AI-900)

2025

Microsoft (University Cloud AI Challenge 2025)

Credential : credly.com/badges/d87b57ad-e0c9-4a59-9205-0104d801c23d

GitHub Actions Learning - Beginner Completion Badge

2026

github-actions-learning Community Project

Credential : github.com/nisalgunawardhana/github-actions-learning/issues/218
